Montgomery Zoo Gift Shop

## Get to Know the Candidates

Conservation Party Candidate:

**AL**

The Conservation Party supports the guarding and wise use of the environment. It was founded with the principle goal of protecting species, their habitats, and ecosystems from excessive rates of extinction.

The Conservation Party selected Al as its candidate since it is short for Alabama, making it the perfect name for the brother of Monty (short for Montgomery).

Preservation Party Candidate:

**BLUE**

The Preservation Party supports the protection of natural environments. It was founded with principle goal of reducing human impact on the environment.

The Preservation Party quickly endorsed BLUE as its candidate after the huge support of the name from social media and the significance of the calf being born on the super blue/blood moon night of January 31, 2018.

Protection Party Candidate:

**LEVI**

The Protection Party supports the safeguarding of wild plant and animal species and their habitats. It was founded with the principle goal of ensuring that nature will be around for future generations to enjoy.

Because the Zookeepers are the protector of the zoo animals LEVI was the perfect candidate for the Protection Party. The name comes from Leviathan, which is Hebrew for sea monster. The name was chosen due to the energetic personality of the calf.

The parties represented are entirely fictional and not based on any real political party or other type of organization.
